ACLASTA®
Zoledronic acid 5 mg/100 ml Solution for intravenous infusion
S.N.I.

S.1. WHAT IS THE MEDICINE INTENDED FOR?

This medicine is used for the treatment of osteoporosis in women who require bisphosphonate therapy and for the prevention of skeletal-related events in patients suffering from bone metastases of cancer in adults.

S.2. WHO SHOULD NOT TAKE THE MEDICINE?

Do not use the product:

- if you are allergic to zoledronic acid or any of the substances in the list of ingredients, listed in Section 6.

S.3. HOW SHOULD YOU USE THE MEDICINE?

Treatment of osteoporosis:

1. Take the medicine as instructed by your doctor or pharmacist. The首次 dosage is generally 5 mg given as one injection at an interval of at least 3 months.

2. You can eat as usual on the day you are treated with Aclasta.

3. If you have kidney problems, or had in the past, you are unable to take daily calcium and vitamin D supplements.

4. Therapeutic group: bisphosphonates.

S.4. SIDE EFFECTS

The majority of the side effects, such as fever and chills, are common, but are less common following subsequent doses. Pain in the muscles or joints, and headaches, occur rarely. Other common effects include:
